

Twist's Gold Standard in Antibody Discovery

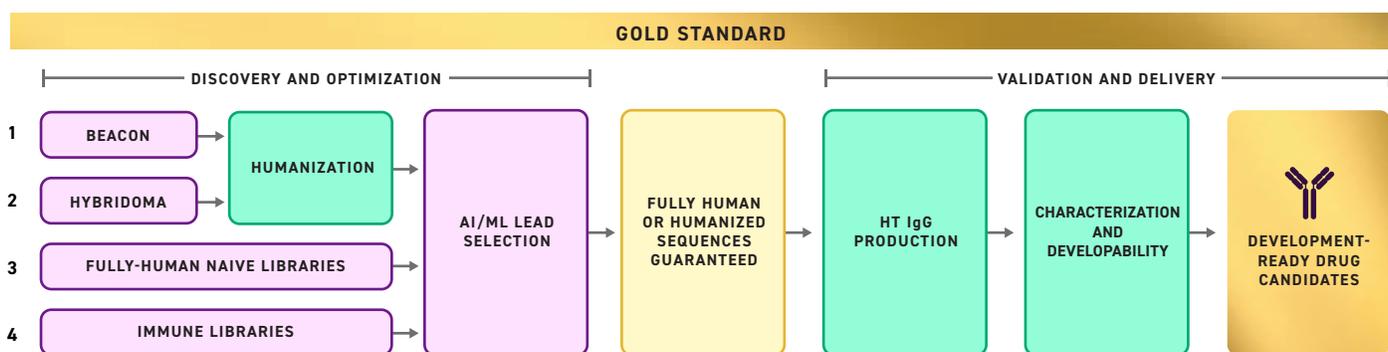

Twist's Gold Standard antibody discovery offering is a truly comprehensive, multi-pronged approach that leverages *in vivo*, *in vitro*, and *in silico* methods to help maximize your shots on goal and expedite your path to the clinic. We recognize that antibody discovery is not a one-size fits all approach and despite what others may say, every platform has its own inherent limitations and potential risks.

This unrivaled discovery service utilizes multiple platforms simultaneously to de-risk campaigns and maximize chances of identifying desired therapeutic lead candidates.

Backed by 10+ years of experience, our team of antibody experts, will work with you every step of the way to **guarantee** delivery of sequences and/or purified, fully validated, development-ready drug candidates tailored to your specific program needs.

What is a gold standard workflow?

Twist's Gold Standard workflow brings together the full scope of capabilities from two industry titans, Abveris and Twist Biopharma. Our Gold Standard workflow leverages at least 2 parallel paths; *in vivo*, *in vitro*, or a combination approach (i.e., immune libraries), and leverages *in silico* methods to bolster the outputs from each path. Our partners can choose what discovery platform they would like to use or work with our antibody enthusiasts to help them decide.

Key benefits

This ability to leverage our *in vivo*, *in vitro*, and *in silico* workflows simultaneously paired with access to our downstream HT IgG expression, characterization, and optimization services provides our partners with an unrivaled comprehensive antibody discovery experience unlike any other. The holistic platform ensures diversity, breadth of screening, throughput, and speed to the clinic and ensures that no hit will be left behind in the race to therapeutic development.

Twist Biopharma Solutions is your unfair advantage

Mitigate

Avoid risk of failure associated with using just one technology.

Best-in-class

Gain access to all of the industry's best technologies under one roof for discovery, expression, characterization, and optimization.

Don't compromise

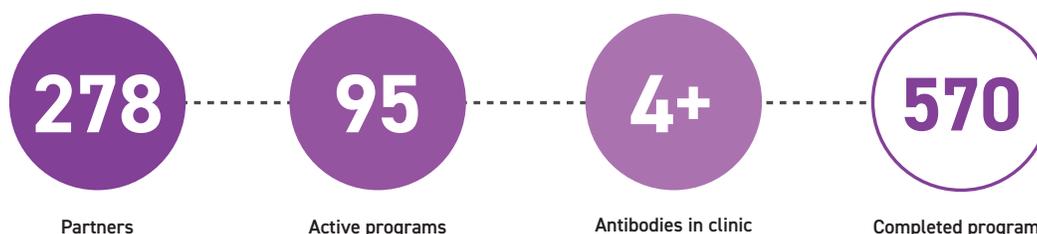

With access to industry-leading *in vivo*, *in vitro*, and *in silico* platforms, you don't need to compromise.

Guaranteed

We value our partners and stand by our work. If we don't find antibodies specific to your target of interest, we will perform an additional round of discovery for free.

Proven track record

For partners looking to get it right the first time, the choice is easy.
